### ST-360 Altitude Selector/Alerter (LCD) System

The ST-360 is a unique system which significantly lowers cockpit workload.

It provides pre-selected altitude capture, digital vertical speed input, and aural & visual alerting at selected altitudes.

#### Features/Functions

- Digital vertical speed select for climb or descent.
- Pre-select and capture altitude; with visual and aural alerts.
- Alert if aircraft departs selected altitude.
- Selectable DH (decision height) or MDA (minimum descent altitude), with visual and aural alerts.
- Monitor outputs of altitude encoder.
- Automatic vertical speed reduction prior to altitude capture.

#### Specifications

- Panel Mounted Programmer/Annunciator with LCD Display
- Completely case-contained
- Requires input from aircraft's altitude encoder.
- Power Required – 14/28 VDC
- Weight – 1.25 lbs.
- Dimensions – 1.6 x 3.42 x 6.75 in.
- Approved to TSO C9c
- Available as an option for S-TEC Autopilot systems with altitude hold and vertical speed control.
